California has a \$17 Billion deficit. When our family healthcare services and public school programs are experiencing drastic spending cuts, why should we subsidize the abortion industry? The nation's largest abortion provider, Planned Parenthood, reported \$114.8 million in profit for 2006-07, while California PP affiliates have allegedly over-charged our state by \$180 million. Very clearly, the abortion industry does not deserve our hard-earned tax dollars! Currently, \$33 million of our state tax dollars pay for 95,000 abortions each year.

**Women deserve our help, not a free abortion!**

**Training/Orientation: 10:00 am Capitol Committee Room 126  
with Legislative visits from 1:00-4:00 pm**
